PROFESSIONAL SUMMARY

Planning Analyst at Zepto with core expertise in managing inventory positions, purchase order (PO) workflows, and nationwide sales and buying projections. Experienced in automating brand-level buying targets, orchestrating Minimum Stock Level (MSL) tracking, and diagnosing forecast variances to ensure high on-shelf product availability. Adept at turning supply chain, warehouse capacity, and replenishment data into actionable operational decisions that prevent stockouts and minimise inventory loss.

EXPERIENCE

Manager II - Planning Analyst | **Zepto** June 2025 – Present

- **Inventory & Product Availability:** Built and deployed Delta Solve, lifting nationwide product availability by **3–4%** by automating store replenishment allocations directly from available warehouse inventory.
- **Sales & Buying Numbers:** Own forward buying and sales projections, leading end-to-end SSD tracking for month-end bumped-up buying events across **100% of target brand categories** since the October cycle.
- **PO Operations & Inwarding:** Directed the festive priority PO ranking system across high-volume inbound shipments, cutting inwarding delays by **~30%** and accelerating stock readiness for peak sales events.
- **Stock Sufficiency (MSL):** Maintained nationwide Minimum Stock Level (MSL) workflows across stores and hubs, mitigating stockout risks and curbing excess inventory holding by **15–20%**.
- **Planning Automation:** Automated brand-level projection and inventory analytics pipelines, cutting routine planning turnaround by **50%** and saving **20+ analyst hours weekly**.
- **Loss Analytics & Benchmarking:** Designed loss-monitoring dashboards that benchmarked inventory write-offs and store-level stock imbalances, helping recover **critical stock availability** in high-demand clusters.

PROJECTS UNDERTAKEN

Delta Solve – Store Replenishment & Demand Recovery [ZEPTO]
Identifies localized stock gaps across customer-serving stores and optimizes warehouse replenishment allocations; unlocked **3–4% higher availability** and recovered estimated unfulfilled demand across restricted categories.

Festive Tracking & Priority PO Inwarding Framework [ZEPTO]
Established an operational ranking framework for released POs based on live warehouse intake capacity and sell-through rates, reducing critical festive inwarding backlog by **~30%**.

Minimum Stock Level (MSL) & Stock Health Workflow [ZEPTO]
Implemented automated benchmarking of on-hand stock against forward run-rates, giving daily early-warning alerts that reduced both stockout events and aged overstock by **15–20%**.

Inbound Capacity & Warehouse Utilisation Monitor [ZEPTO]
Engineered a real-time monitor matching inbound shipment loads against active dock capacity and open POs, mitigating dock congestion and smoothing dock utilization across peak hours.

Brand Projections & Buying Automation [ZEPTO]
Automated brand-level purchase projections by synthesizing multi-month consumption trends, reducing manual calculation time by **50%** and significantly accelerating monthly buying cycles.

University Inquiry Support System (NLP Chatbot) [COLLEGE PROJECT]
Trained an NLP chatbot on **3,000+ data points**, achieving **~95% query resolution accuracy** and drastically cutting response times for prospective students and parents.

ACADEMIC DETAILS

B.Tech, Computer Science & Engineering (Data Science) — Presidency University, Bangalore CGPA: **9.11 / 10** | Completed 2024

SKILLS & PROFICIENCY

Core Competencies:	Inventory Management, Purchase Orders (POs), Sales & Buying Projections, Stock Sufficiency (MSL), Inbound Capacity Planning, Replenishment, Supply Chain Analytics
Technical & Data:	SQL, Python, Databricks, Data Pipelines & Automation, Statistical Analysis, Alteryx, R Programming
Reporting & BI:	Dashboarding, KPI Tracking, Loss & Variance Benchmarking, Business Intelligence Tools

TRAININGS & CERTIFICATIONS

- **Data Analytics Essential** — Cisco
- **Data Science Virtual Experience Program** — BCG (Forage)
- **Databases and SQL for Data Science** — Coursera
